

How To Create A GitHub Repository And Add Collaborators

Create a Repository

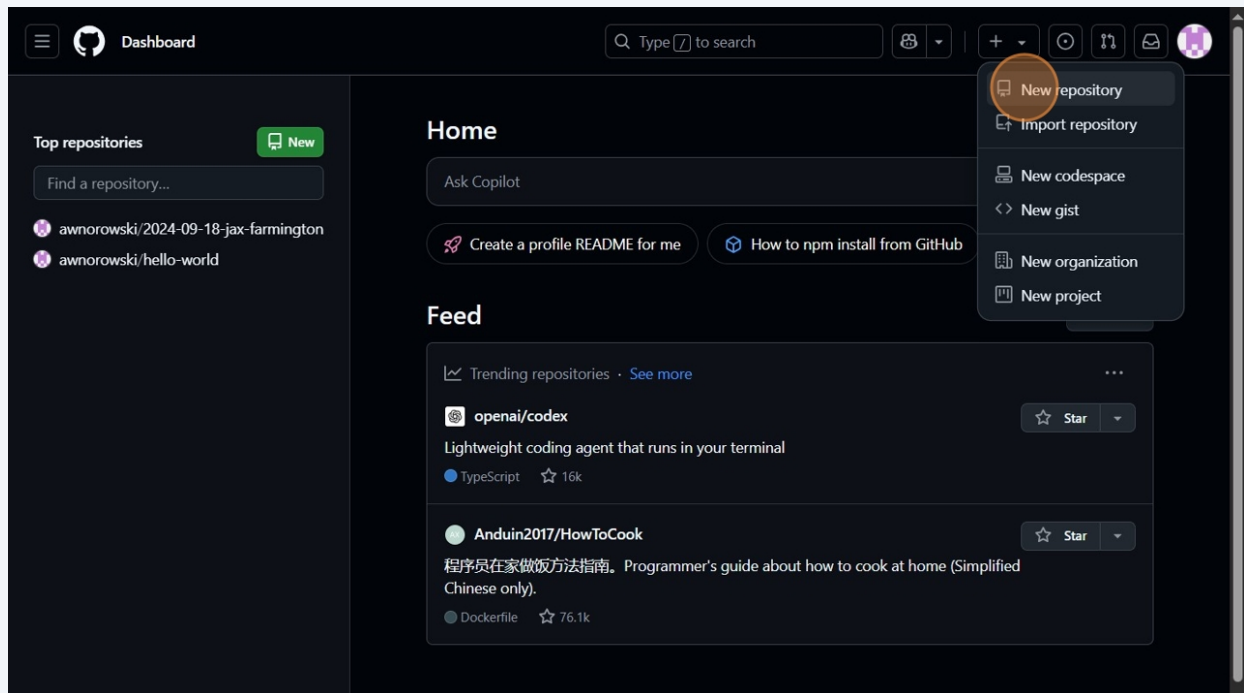

1 Navigate to <https://github.com/dashboard>

2 Click on the **plus sign** in the top right.

3 Click "New repository"

4 Click the "Repository name" field.

Required fields are marked with an asterisk (*).

Repository template

No template ▾

Start your repository with a template repository's contents.

Owner * Repository name *

 awnorowski ▾ /

Great repository names are short and memorable. Need inspiration? How about [glowing-doodle](#) ?

Description (optional)

☒  **Public**
Anyone on the internet can see this repository. You choose who can commit.

☐  **Private**
You choose who can see and commit to this repository.

Initialize this repository with:

☐ Add a README file
This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore

.gitignore template: None ▾

Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

5 Type in a name for your new repository.

6 Click the "Description (optional)" field.

Required fields are marked with an asterisk (*).

 You are creating a private repository in your personal account.

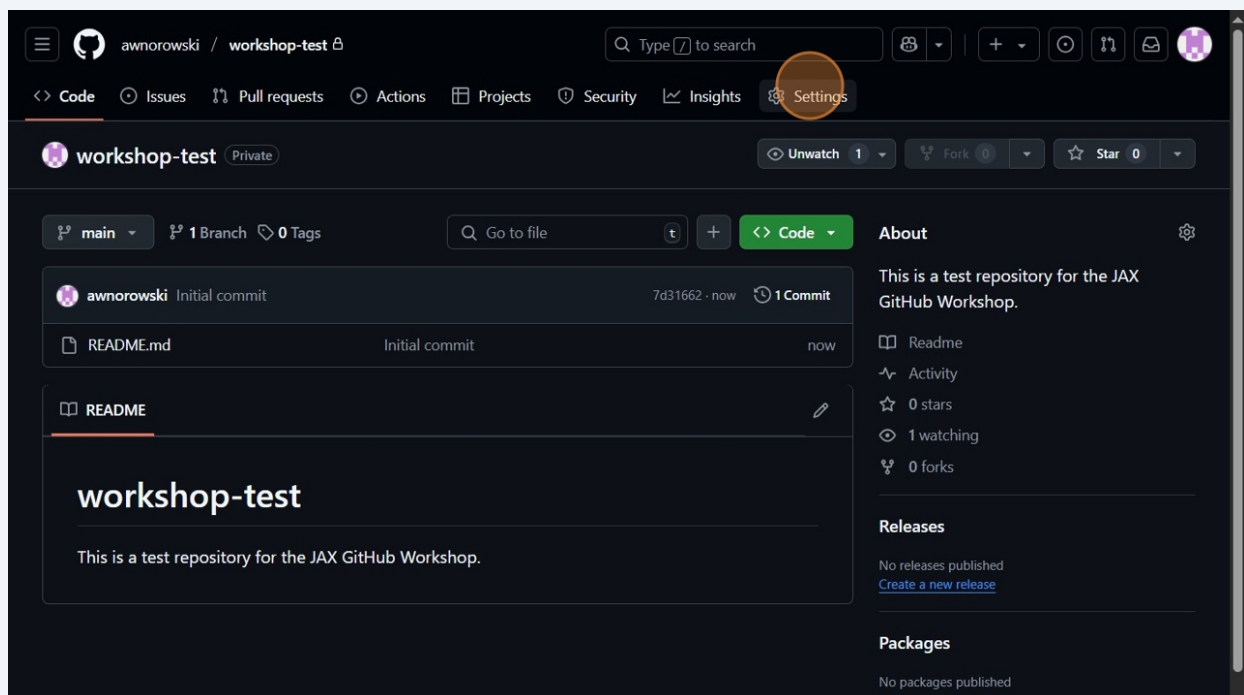

10 Click "Create repository"

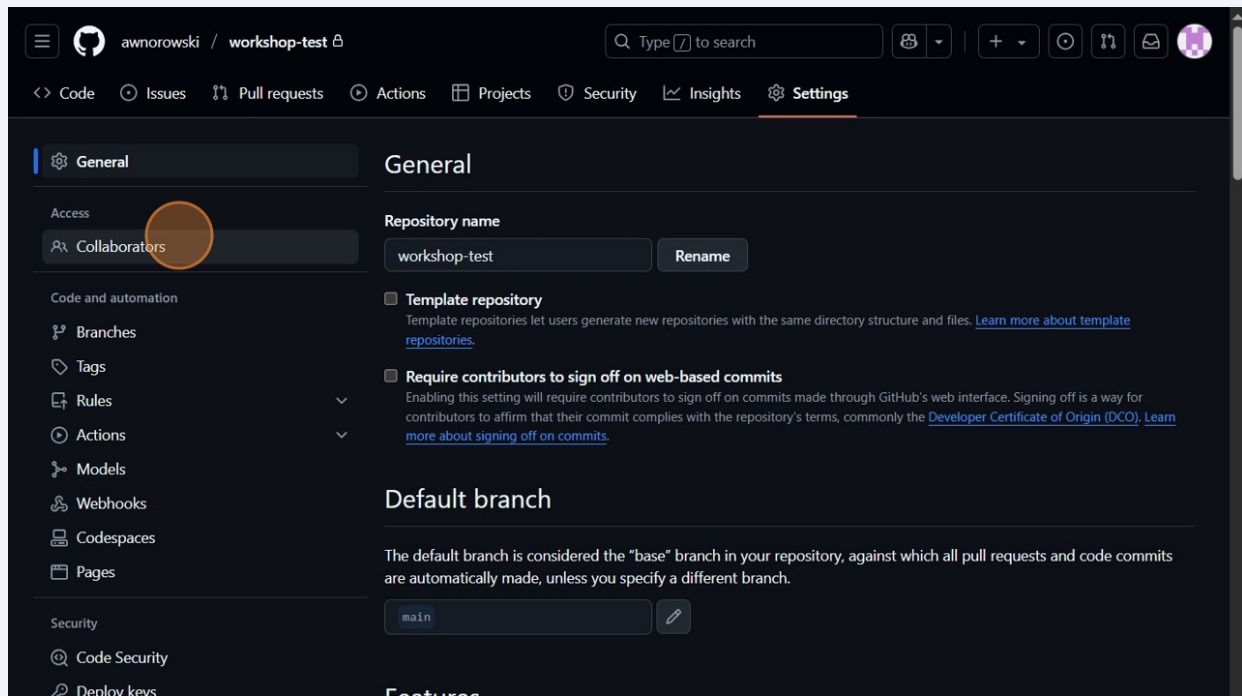

The screenshot shows the GitHub 'Create repository' form. At the top, there are two radio buttons for repository visibility: 'Public' (unselected) and 'Private' (selected). Below this, the 'Initialize this repository with:' section has a checked box for 'Add a README file'. The 'Add .gitignore' section shows a dropdown menu set to 'None'. The 'Choose a license' section also shows a dropdown menu set to 'None'. At the bottom right, a green 'Create repository' button is highlighted with a red circle.

Add Collaborators to Your Repository

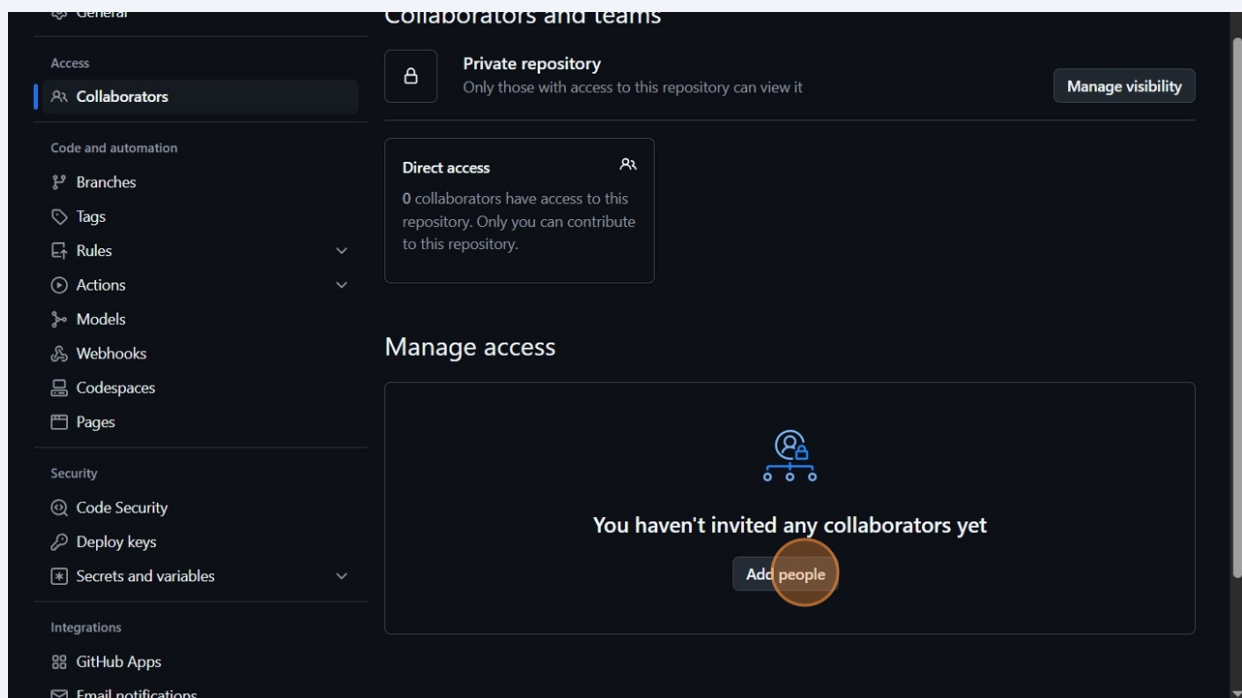

11 On your repository page, click "Settings"

12 Click "Collaborators"

13 Click "Add people"

14

Type in the username of the collaborator you'd like to add, then click "Add to repository"
